

FOOTPRINT TEST CERTIFICATE

This is a test PDF template created with Open Office. It contains Acroform Fields and also static contents. This was designed to support the TestCase, and the fields in this certificate are mapped to fields in the file `test/files/test.csv`:

DataSource	PDF Template
table column names	acroform field names
first_name:	
tratamento:	
company:	

Special remarks:

- Empty fields in csv file or not present in the pdf template are ignored by the footprint library
- Combined values are not yet supported, i.e., you cannot fulfill a field with two distinct columns from the data source
